4. This standard contains excerpted text from an ISO or IEC standard, but is not an ISO or IEC adoption.	<input type="checkbox"/> Check here if this standard includes excerpted text from an ISO or IEC standard but is not an identical or modified adoption of an ISO or IEC standard.
5. Provide a brief explanation of the need for the project:	There are no standards for root and soil modifications performed as tree care maintenance operations. Standard root management and soil modifications have the potential to improve the quality, life expectancy, and safety of trees. Non-standard root management and soil modifications can adversely affect the quality, life span, and safety of trees. Non-standard root management and soil modifications have resulted in notable project failures. Non-standard root management and soil modifications can increase liability exposure for companies and clients.
6. Identify the stakeholders (e.g., telecom, consumer, medical, environmental, etc.) likely to be directly impacted by the standard:	Tree care professionals, tree care industry, green industry, land care industry, consumers, government agencies.
7. This PINS revises a previous PINS submittal:	<input type="checkbox"/> Note: A revised PINS is only required if the previously identified stakeholders have changed substantively (see item 6 on this form.).

8. Description of Contents of Standard: (Provide a one paragraph description, not to exceed 500 characters.)	This project will create performance standards for the care and maintenance of trees, shrubs, and other woody plants during root management and soil modification operations. The standard requirements and recommendations will outline the parameters that root management and soil modifications need to meet and also will provide guidelines for writing work specifications.					
9. Canvass Developers: (This request must include a statement of how to obtain a copy of the canvass list.)	<input type="checkbox"/> Check here to request Canvass Initiation Announcement.
