Scope summary			
A300 (Part 8) Root and Root Zone Management standards are performance standards for management of trees, shrubs, and other woody plant root and root zones. Items addressed include, but are not limited to: root pruning; root assessment; assessing soil conditions; mulching; tilling (cultivation); addition of soil amendments; moisture management; and, improving drainage. It is a guide in the drafting of work project specifications for consumers as well as federal, state, municipal, and private authorities including property owners, property managers, and utilities.
